MEMORANDUM FOR:

In general, I have made only editorial types of corrections which I feel may improve the clarity. In the section on National Imagery Exploitation Information Base, I have a whole bunch of problems, however, because this should be exactly consistent with the story told in the Appendix L. I would think that this entire part ought to be rewritten after a decision is made on Appendix L. As now written, the concepts support only Option 1, and a considerable amount of re-thinking would be required, particularly on the procedures for the maintenance of the base to accommodate Options 2 or 3.
